### Optimising Sisra Analytics for Westcountry Schools

#### Overview

Juniper Education is proud to partner with Westcountry Schools to deliver websites and support pupil progress tracking. As part of this collaboration, we provide health check sessions for all secondary schools, ensuring Sisra Analytics is optimised to maximise value. These sessions focus on enhancing data accuracy, streamlining school-level processes, and improving MAT-wide reporting for better decision-making and resource alignment.

#### Approach

- **Targeted School Support:** Our Customer Success Manager (CSM) Frankie Stanley engaged with every Westcountry secondary school and their data leads, addressing specific challenges and providing customised training.
- **Comprehensive Feedback:** Frankie documented school-specific insights, facilitating MAT-wide alignment.
- **Reassurance:** Tailored support boosted trust and effective Sisra usage.

#### Results

- **Improved Confidence:** Data leads gaining further proficiency and trust in Sisra.
- **Streamlined Reporting:** Schools aligned with MAT priorities for better insights.
- **Time Efficiency:** Reduced administrative overheads due to optimised processes.

#### Quote

"I felt Juniper Education's support and follow-up were excellent. They went way beyond just a check-up and helped our data leads in schools further explore the versatility available to them."

**Nat Parnell**  
**Deputy CEO, Westcountry Schools Trust**
